Sub Floor Vents – Anti Spark

AS 3959 is the Australian Standards for building in a bushfire prone area, it not only covers new buildings but also existing buildings

According to AS3959-2009 Vents and Weepholes in external walls shall be screened with a mesh with a maximum aperture of 2mm, made of corrosion-resistant steel, bronze or aluminum, except where the vents and weepholes have an aperture less than 3mm, or are located in an external wall of a subfloor space.

Wilmplex Anti-Spark Vents are made with Bronze mesh with an aperture of 1.95mm.
