

Wilmaplex

A photograph of a wooden building frame under construction against a clear blue sky. The frame consists of numerous vertical studs and horizontal beams, with a ladder leaning against the left side. The lighting suggests a bright, sunny day.

Your trusted building partner for over 35 years

Welcome to Wilmaplex

Australia's home of quality metal hardware and building products, backed by over 35 years of industry expertise and experience.

Founded in 1988, we are proud to be a leading manufacturer of high quality metal hardware and building products made in Victoria, Australia.

Driven by innovation, we are continually expanding our product range to meet the evolving needs of our customers and the industry.

We are committed to manufacturing in Australia, to ensure the delivery of high quality products our customers have come to expect from Wilmaplex, and to support local jobs.

Our combination of industry knowledge and long history in Australian manufacturing makes us a brand you can rely on time and again.

NOTE: Use 4.6 grade bolts conforming to AS1111, the driving of the bolts shall be in accordance with the requirements in AS1720.1 Use galvanised coach screws. The distance from the top of the concrete to the underside of the post anchor base must be less than 300mm. Hot Dip Galvanised is used with 4mm thickness. It is required that all post must bear on the post anchor base, and a minimum post size of 90x90mm shall be used. A structural engineer must check the capacities table in case of substantial wind loads and also to check the adequacy of concrete anchorage. $A_k1=1.14$ was used based on AS1170 to determine wind uplift capacity
